MINUTES

Meeting Date: October 17, 2013

MEDICAL AND PROFESSIONAL AFFAIRS/ INFORMATION TECHNOLOGY COMMITTEE BOARD OF DIRECTORS

ATTENDEES

COMMITTEE MEMBERS:

Michael A. Stocker, MD, Chairman Alan D. Aviles Josephine Bolus, RN

Amanda Parsons, MD (representing Health Commissioner, Thomas Farley, MD in a voting capacity)

HHC CENTRAL OFFICE STAFF:

Sharon Abbott, Assistant Director, Corporate Planning and HIV Services

Suzanne Blundi, Deputy Counsel, Office of Legal Affairs

Louis Capponi, MD, Chief Medical Informatics Officer

Deborah Cates, Chief of Staff, Board Affairs

Paul Contino, Chief Technology Officer

Barbara Delorio, Senior Director, Internal Communications

Christine Desrosiers, Office of Legal

Juliet Gaengan, Senior Director, Quality Management

Lauren Haynes, Assistant System Analysis, President Office

Marisa Salamone-Greason, Assistant Vice President, EITS

Sal Guido, Assistant Vice President, Infrastructure Services

Caroline Jacobs, Senior Vice President, Safety and Human Development

Lauren Johnston, Senior Assistant Vice President/Chief Nursing Officer, Patient Centered Care

Irene Kaufman, Senior Assistant Vice President, Ambulatory Care Transformation

Mei Kong, Assistant Vice President, Patient Safety

Jo Ann Liburd, Senior Director, Accreditation and Regulatory Affairs

Patricia Lockhart, Secretary to the Corporation

Tamiru Mammo, Chief of Staff, Office of the President

Ana Marengo, Senior Vice President, Communications & Marketing

Antonio D. Martin, Executive Vice President/Corporate Chief Operating Officer

Kathleen McGrath, Senior Director, Communications & Marketing

Andrea Mera, Director, Office of Healthcare Improvement

Deirdre Newton, Office of Legal Affairs

Bert Robles, Senior Vice President, Chief Information Officer

Salvatore Russo, Senior Vice President & General Counsel, Legal Affairs

David Stevens, MD, Senior Director, Office of Healthcare Improvement

Diane Toppin, Director, Office of Behavioral Health

Steven Van Schultz, Director, IT Audits

Joyce Wale, Senior Assistant Vice President, Office of Behavioral Health

Jaye Weisman, Ph.D., Assistant Vice President/COO, Accountable Care Organization

Manasses Williams, Assistant Vice President, Office of Affirmative Action/EEO

Ross Wilson, MD, Senior Vice President/Corporate Chief Medical Officer

FACILITY STAFF:

Ernest Baptiste, Executive Director, King County Hospital Center
Lynda D. Curtis, Senior Vice President, South Manhattan Network
Elizabeth Gerdts, Chief Nurse Executive, North Central Bronx Hospital
Terry Mancher, Chief Nurse Executive, Coney Island Hospital
Ellen O'Connor, Chief Nurse Executive, Jacobi Medical Center
Arnold Saperstein, MD, Executive Director, MetroPlus Health Plan
Joseph Skarzynski MD, Medical Director, Jacobi Medical Center
Denise Soares, Senior Vice President, Generations+/No. Manhattan Network, Harlem Hospital Center
Maurice Wright, MD, Medical Director, Woodhull Medical and Mental Health Center

New York City Health and Hospitals Corporation

OTHERS PRESENT:

Moira Dolan, Senior Assistant Director, DC 37, Research & Negotiations Department Scott Hill, Account Executive, QuadraMed Adam LaChant, Dyntek Services, Inc. Richard McIntyre, Key Account Executive, Siemens Megan Meagher, Analyst, Office of Management and Budget Tamara Robinson, CIR/SEIU Deborah Terry, The Nash Group

MEDICAL AND PROFESSIONAL AFFAIRS/ INFORMATION TECHNOLOGY COMMITTEE Thursday, October 17, 2013

Michael A. Stocker, MD, Chairman of the Board called the meeting to order at 10:15 AM. The minutes of the September 12, 2013 Medical & Professional Affairs/IT committee meeting were adopted.

CHIEF MEDICAL OFFICER REPORT

Ross Wilson, MD, Senior Vice President/Corporate Chief Medical Officer reported on the following initiatives:

1. Touro College Physician Assistant Program/HHC Agreement

HHC has signed an agreement with Touro College to develop and promote a behavioral health track within the Touro Physician Assistant Program. This behavioral health track will prepare master's level PAs to practice at HHC and other clinical sites. This is a no-cost agreement between HHC and Touro. HHC has a role in curriculum development for the Psychiatric Physician Assistant (PPA) track and facilities will serve as training sites.

2. National Depression Screening Day (NDSD) 2013

Held annually in October during Mental Illness Awareness Week, National Depression Screening Day (NDSD) raises awareness and screens people for depression and related mood and anxiety disorders. HHC has participated annually for the last decade and this year held screenings at 12 sites on October 10, 2013. This event allowed our Departments of Psychiatry to provide vital community outreach in the forms of distribution of educational material and resources, screening's and referral. 886 people were provided educational materials with 578 screened and 85 were linked to treatment. This work is in addition to the routine depression screening that is occurring in primary care clinics at HHC all year around.

3. Patient Centered Medical Home (PCMH)

In FY 2013, HHC received an additional \$18.2 million in enhanced reimbursements under New York Medicaid's Statewide Patient-Centered Medical Home Incentive Program, We have already received notification that 2 facilities (Gouverneur D&TC and Harlem Hospital) both achieved Level III recognition. We are on track to be eligible for PCMH recognition with the newer 2011 standards by the end of December 2013 all our primary care clinics at our 11 hospitals and 6 Diagnostic and Treatment HHC facilities.

4. NYS Health Home

The HHC Health Home Program operates in Brooklyn, Queens, Manhattan and the Bronx, and enrollments continue to grow steadily. An additional 230 patients were enrolled during the past quarter so that HHC Health Home now has 1588 active patients. Seventy percent of Health Home patients have transitioned from legacy case management programs; the balance of enrolled Health Home patients was either recruited from NYSDOH roster of eligible patients or have been referred to the program.

5. <u>Improving Access to Primary Care</u>

The access improvement work continues to make solid progress across six pilot facilities: Harlem, Kings, Gouverneur, Lincoln, Jacobi and Metropolitan Hospitals. We will accelerate our rollout plan and engage with our remaining eleven facilities by this coming December, in order to better prepare for Exchange-related new patient volumes. Within primary care, the key focus area of this work, we continue to identify significant patient capacity with existing resources, through the implementation of a few key strategies.

6. Nursing

The Mosby Skills project is going live across the corporation this month, to provide an on-line resource of standardized, evidence-based protocols for all nursing staff. This valuable initiative will eventually be interfaced with People Soft and EPIC.

As part of our efforts to promote clinical leadership jointly from Medical Directors and Chief Nurse Executives, a very effective retreat/learning session was held. One of the key learning components was led by a symphony orchestra conductor, and was very well received. We are planning more work on the modeling of leadership teamwork between the physician and nursing leads.

7. Credentialing

The HHC Centralized Clinical Credentialing Project is proceeding according to schedule. Key benefits of the new system will be:

- 1. Greater efficiency: standardized, automated processes will speed up credentialing and re-credentialing. In addition it will facilitate credentialing of providers at more than one site, as we increasingly network services.
- 2. Emergency Readiness: capability to rapidly credential HHC medical staff at other facilities
- 3. Far more convenient for providers to use a web interface to manage their applications

The first Go-Live is at the Queens Healthcare Network on December 16. The remainder of HHC will be added one network at a time, with completion by the end of April. Office of Healthcare Improvement will provide training to key personnel as well as on-site support for medical staff offices during their Go-Live weeks

8. Flu Vaccination for employees and patients

Implementation of the NYS regulations for the wearing of a mask for any health care workers who are not immunized is gathering momentum. We have already vaccinated many more employees than last year and many employees who have not previously chosen to be vaccinated. We were initially slowed by slow delivery of vaccine supplies but all sites currently have sufficient supply for patients and staff.

9. Leadership Changes in the Division of Medical & Professional Affairs

I have great pleasure in announcing the appointment of Dr. Machelle Allen as Senior Assistant Vice President and Deputy Corporate Chief Medical Officer. Dr. Allen will commence on or after October 21 and will head the Office of Healthcare Improvement. This office will expand its functions to include Women's Health, Patient Centered Medical Home and Research, with all the current staff involved in those functions being re-aligned to this revised structure.

In addition, Dr. Christina Jenkins becomes the Senior Assistant Vice President heading the new office of QA, Performance and Innovation. This is based on the existing QA office but will now include Clinical Risk, as well as the current innovation projects Dr. Jenkins is leading (access to ambulatory services, physician compensation & productivity and tele-radiology). The focus on performance will be through strengthening our quality data by hoping to harness the benefits of the corporate business intelligence project to provide timely and accurate performance reports to the local level.

In addition, following the retirement of Ms. Susan Meehan after 26 years at HHC and I would like to thank her for her service. Ms. Karen Mattera is acting corporate coordinator of Emergency Preparedness and Ms. Diane Toppin is acting divisional administrator.

I would like to congratulate Drs. Allen and Jenkins and also to thank Karen Mattera and Diane Toppin for "stepping up" so effectively. Finally, I would like to recognize the long service that Susan Meehan has provided to HHC and wish her well in retirement.

METROPLUS HEALTH PLAN, INC.

Arnold Saperstein, MD, Executive Director presented to the Committee. Dr. Saperstein informed the Committee that the total plan enrollment as of October 2nd, 2013 was 422,472. Breakdown of plan enrollment by line of business is as follows:

| Medicaid | 360,019 |
|-------------------------------|---------|
| Child Health Plus | 12,217 |
| Family Health Plus | 33,813 |
| MetroPlus Gold | 3,289 |
| Partnership in Care (HIV/SNP) | 5,410 |
| Medicare | 7,305 |
| MLTC | 419 |

Attached are reports of members disenrolled from MetroPlus due to transfer to other health plans, as well as a report of new members transferred to MetroPlus from other plans.

This month, we lost approximately 3,700 members. We continue our efforts to address our membership losses and have recently completed a closer look at the application submission and acceptance process to HRA and are seeking to improve this process.

In October, the NY State of Health, the Official Health Plan Marketplace went live, offering health insurance options for consumers. As of October 24th, nearly 174,000 New Yorkers completed the full application process and were determined eligible for health insurance plans. New York State's completed applications make up more than 30 percent of the total applications completed nationwide. Additionally, as of October 24th, 37,030 New Yorkers have fully enrolled for health insurance through the NY State of Health marketplace. By media reports this number includes 23,717 in Medicaid and 13,313 in a Qualified Health Plan. The Medicaid enrollments are being held by the state and will be shared with the plans in December. NYS has started transmitting enrollments to the plan via a '834 Transaction File'. As of the writing of this report, MetroPlus has received 1,200 members that have selected MetroPlus as their plan. The plan has been informed that the processing of the enrollment transactions has been delayed, so we do not know the actual number of individuals that have chosen our plan. Additionally, NYS held a series of train-the-trainer sessions this month to allow state managed care plans and others to train Certified Application Counselors (CACs). The State mandated that training sessions could only commence upon receipt of a state- approved training curriculum. MetroPlus has received its training curriculum from NYS and will immediately begin training our Facilitated Enrollers (FEs) to serve as Certified Application Counselors (CACs).

This month, MetroPlus has entered into an agreement with eleven HHC facilities to offer a grant for MetroPlus Care Managers. This grant funds 17 positions as part of an expansion of the current HHC Emergency Department (ED) Care Case Management Project. The new MetroPlus Care Managers will be on site at each facility and will be a fully integrated and engaged member of the Inpatient Project RED and ED Care Management Interdisciplinary Teams. These care managers will facilitate MetroPlus' patient's progress during their stay in the inpatient or ED setting. The current program is showing encouraging results and we expect that this expansion will continue to positively impact our members as they are admitted and discharged at our HHC facilities.

MetroPlus is preparing for the carve-in of the nursing home population. Beginning in January 2014, Medicaid recipients in New York City newly requiring long term nursing home placement will enroll in, or remain in, a managed care plan. Plans will be required to pay, at minimum, the current nursing home fee-for-service rate, which will include the nursing home capital component and the nursing home quality add-on, for two years. Based on workgroup recommendations, DOH is developing guidance on eligibility determination periods, network adequacy requirements, authorizations, and credentialing. The department recommended close coordination among plans and nursing homes with hospital providers, Health Homes, New York City Human Resources Administration (HRA) and Local Districts of Social Services (LDSS) around discharge planning and care management. MetroPlus' internal preparation to service this population is well underway and we anticipate no issues with this implementation.

ACTION ITEM:

Authorizing the President of the New York City Health and Hospitals Corporation ("the Corporation") to negotiate and enter into a contract with Dyntek Services, Inc., McAfee's authorized reseller and maintenance provider for security hardware, software licenses, related maintenance and professional services through a NYS Office of General Services ("NYS OGS") contract, for a term of 2 years and 9 months, in an amount not-to-exceed \$11,360,499.

McAfee Enterprise Licensing Agreement

The accompanying resolution requests approval to negotiate and enter into a contract with Dyntek Services, Inc. to purchase hardware, software, related maintenance and professional services on an on-going basis in an amount not to exceed \$11,360,499 for 2 years and 9 months.

Through this program (McAfee's Enterprise License Agreement or "ELA"), HHC is undertaking an important initiative to protect its critical assets including ePHI (electronic patient health information), comply with regulatory requirements and improve the operational efficiency of its security and risk management operations while reducing its security expenditures. HHC is facing an overwhelming task of dealing with complex security issues, targeted attacks, more stringent regulatory requirements (HIPAA/HITECH) and increased risk of data breaches. In addition, as HHC continues with the consolidation of its data centers and prepares for EMR/EPIC, it is extremely important that the correct security controls are in place at the hospitals as well as the data centers.

HHC spent almost \$3.4 million for the GRM data breach in FY 2011. Most recent statistics by the Ponemon Institute put data breaches at \$214 per record and on average \$7.2 million per data breach. For the amount of patient data HHC deals with, this could have a detrimental impact to the Corporation. The Encryption, Intrusion Prevention System (IPS), and Data Loss Prevention (DLP) projects were undertaken to reduce the likelihood of such breaches, provide protection against new threats and safeguard our data centers from the outside as well as inside. The encryption project has been completed as of 9/15/2013, the IPS project is 7.6% complete (2 out of the 26 facilities) and the DLP proof of concept has been kicked off as of 8/1/13. As part of the ELA, HHC can complete these projects and avoid almost \$27.6 million in costs

The Enterprise License Agreement will allow HHC to procure, implement and manage security controls in a cost effective manner. The agreement provides approximately 70% discount over list price and provides payments for the hardware, software, services and support in a fixed annual payment schedule. In addition, the program will (i) improve HHC's ability to prevent and respond to cyber security incidents, (ii) pass on to Dyntek the responsibility for hiring and retention of skilled security staff and (iii) provide access to McAfee's (Intel) state of the art technology and research. Having access to the right information and resources at the right time can make all the difference when dealing with a cyber-attack.

Over the past three fiscal years (FY 11, 12 and 13), HHC spent on an average \$2.88 million per year with McAfee for software, hardware and maintenance. As part of the ELA, HHC will be spending approximately \$4.1 million per year for the duration of the contract. The additional \$2.7 million over 2 year and 9 months will allow HHC to avoid \$27.6 million in costs for approved and in progress security projects, reduce the risk of data breaches, provide security assurance to the business and elevate its overall security posture. Below is a cost comparison with and without the ELA for finishing currently approved projects, maintenance, professional services and new security solutions:

| | With ELA | Without ELA | Cost Avoidance |
|-----------------------------|-----------------|-----------------|-----------------|
| Intrusion Prevention System | \$11,360,499.34 | \$39,048,134.79 | \$27,628,631.61 |
| Deployment; | | | |
| Data Loss Prevention; | | | |
| Maintenance; | | | |
| Services; | | | |
| New Security Solutions | | | |

A solicitation was sent out and Dyntek Services, Inc. was selected as the winner based on lowest pricing.

INFORMATION TECHNOLOGY SERVICES

Bert Robles, Senior Vice President, Information Technology Services provided the following updates:

- 1. ICIS Electronic Health Record (HER) Program Update:
 - a. The Epic Foundation Database was loaded on HHC servers and is operational and accessible for HHC EITS staff members.
 - b. Full EPIC certification for 102 EITS staff in their respective modules. In order to achieve certification, the collective group has taken and completed 781 scored projects and exams. HHC staff has achieved 43 perfect scores of 100 on first attempts and the team has 185 Epic certifications: with 44 people earning more than one certification and many earning 3 or more. This group should all be commended.
 - c. The fourth Workflow Preview session was held on September 23 and 24th at 160 Water Street, Bellevue and Harlem Hospitals. While there were hundreds of participants at 160 Water Street over the two days, over 500 participants attended Bellevue Hospital on Day 1 and 210 at Harlem Hospital on Day 2. Included were sessions covering Medication Ordering and Administering, consults in Long Term Care, Nuclear Street Testing and Medication Dispensing.
 - d. There is one last set of sessions scheduled for Wednesday, October 16th for the Behavioral Health Emergency Department team. It will include four workflow sessions: Psych ED Provider Workflow/Documentation, Psych ED Nurse and Support Staff, Psych ED Patient Flow and Psych ED to Inpatient and Extended Observation Unit.
 - e. To date 250 Workflow Preview sessions have been held with more than 2,000 workflows previewed. Approximately 70% of the workflows have been approved.
 - f. An Operations ICIS EHR Kick-Off Meeting for HHC Senior Leadership was held on Tuesday, October 8th at Harlem Hospital Center. The purpose of this event was to provide a high level overview of the Electronic Health Record program as well as delineate the individual and departmental roles for HHC Leadership. The morning session provided a comprehensive review for all attendees with HHC leadership remaining in the afternoon for an in-depth hands-on demonstration by the Epic team on the reporting capabilities of the application.
 - g. Facility Sequencing: Elmhurst and Queens Hospital Centers will be the first two HHC sites to convert from Quadramed to Epic. Jacobi Medical Center and North Central Bronx Hospital will be the second go-live sites. The corporation is currently reviewing the sequence for remaining sites and will present a proposed rollout sequence to the leadership later this fall. Sequencing will be dependent upon several key initiatives and dependencies noted below:
 - h. There are several key dependencies which can impact HHC's anticipated scheduled November 2014 go-live. They are:

- Soarian (Scheduling, EMPI, registration, interfaces & billing deployment must be stable at these sites for at least six (6) months after live activation.
- North Shore-Long Island Jewish lab for rapid response and routine labs must be deployed with Epic.
- ICD-10 implementation date is October 1, 2014. HHC's overall migration from ICD-9 to the new system must be reasonably stable.

These are all large projects. HHC will migrate to the new Joint Venture lab as the Epic Rollout progresses. Each facility will come up on EPIC and the new Joint Venture lab at the same time since lab results must flow into the core system on day one.

2. Fire Department of New York and Wireless Access at HHC Facilities:

Sal Guido, AVP for Infrastructure, recently met with the Deputy Commissioner and CIO of the New York City Fire Department to review wireless access at all HHC Facilities.

A plan has been put in place to install wireless access points at all HHC hospital facility emergency rooms over the next 30 days. Bellevue Hospital Center was completed on September 30th and Kings County Hospital underwent testing of its network during the week of October 7th.

The wireless access is being deployed throughout HHC facilities to allow for document transmissions for registration and vital information directly from the ambulance to the hospital facility, emergency room and eventually to HHC electronic medical record system to eliminate paper and increase patient care.

We are targeting completion by the end of October.

A press conference was held with the Mayor, FDNY leadership and HHC at Jacobi Medical Center to announce this initiative last week.

3. <u>SunGard Safeguards Following Superstorm Sandy</u>:

Superstorm Sandy did not negativity effect HHC's ability to provide computing services from our central data centers at Jacobi, located in the Bronx, or SunGard, located in NJ. HHC conducted a risk analysis on the SunGard facility and found that water levels around the building elevated to approximately 6 feet above normal conditions. SunGard has provided HHC engineering plans that will protect against a 500-year storm as defined by the Army Corps of Engineers. HHC contracted BASE Tactical, an engineering company, to review SunGard's plan to protect against such a storm. We are awaiting the base tactical final report on the viability of SunGard's plan.

Safety and Human Development

Caroline Jacobs, MPH, MS. Ed Senior Vice President

One of the enterprise-wide strategic priorities this year has been increasing staff engagement in TeamSTEPPS by an aggregate 20% (goal was to engage 4700 staff). We chose TeamSTEPPS because healthcare is a team "sport". The goal is to create a shared mental model in the patient care unit so everyone on the team is on the same page with what is going on in the unit. We engaged about 5600 staff in TeamSTEPPS in FY13. All the work has been done internally. No external consultants have been hired. A significant amount of time was spent training the trainers. The challenge is to relate the knowledge acquired to patient outcomes. A pilot study was done at Bellevue to assess retention and implementation of TeamSTEPPS concepts after the training.

Medication Safety – rate of medication reconciliation was assessed and the trend has decreased. There are no medication reconciliation benchmarks. IHI says a rate of 10% is acceptable. Our goal is zero. Mei Kong, IT, and Dr. Mondul have been working on standardizing electronic medication intervention categories across all the facilities. Automated reports are created monthly based on inputted data by the pharmacists from the facilities.

We have created a lot of resources for our providers, one of which is the Opioid Handbook. We have continued the partnership with the NYS Partnership for Patients (in NY it is a collaboration between GNYHA and HANYS, funded by CMS).

HHC's rate of elective early deliveries has decreased. We are continuing our Labor Management Collaboration with the Committee of Interns and Residents. We are engaging the residents in a survey to better understand their interpretation of patient safety in the organization and the types of information they feel they need to be better at assuring patient safety. The next conference will be based on the findings of this survey.

We finalized (and it is out for review) our Policy on Communication of Adverse Events to Patient and Families. Queens and Jacobi are going to be LeapFrog Award Winners for 2013 for their patient safety work.

Dr. Stocker asked if there is an effort to transfer patient safety to outpatient care (i.e. perform medication reconciliation for outpatients). Caroline Jacobs said the literature does not offer a lot of information on the patient safety domain in the ambulatory care setting. We have been trying to figure out ways to go into the patient's home so we can perform medication reconciliation. Dr. Stocker said the second highest reason for readmission within 30 days is medication safety. Caroline Jacobs commented that a project was done at KCH on CHF patients. Pharm-Ds were sent to the patients' homes to perform medication reconciliation; this was very effective in reducing CHF readmission. Mr. Bert Robles suggested using the capabilities of smart phones (i.e. FaceTime, which 60% of our patients have today) to perform medical reconciliation on outpatients. Mei Kong said we are currently trying to set standards for collecting medication reconciliation so that everyone does it the same way; Poly Pharmacy is another project (ex: you can give patients ten prescriptions, but in reality they would only be willing to take five.

We have to decide if that is appropriate and speak to the patients about what they are really intending to do). We will be talking to residents about Poly Pharmacy and see if we really need to give patients ten medications versus what are the five most important ones?

Dr. Wilson said that we run the risk, with many of these ideas, to create another group of people doing a particular function – that is not sustainable. The key issue here is to integrate functions into what we have. If there is a group of patients who need someone in their homes, we need to identify them early. Everyone needs to see their primary care doctor within a week or 14 days. That is why we are working so hard to make PCMH work. If we combine this with TeleMedicine going forward, a lot can be achieved.

Dr. Wilson believes that these conversations show the maturing of the agenda on patient safety – how we redesign the system to get it right. He stated that embracing the Triple Aim and Hoshin Kanri have helped in embracing the Population Health agenda and that if the employees are not engaged in their work, they are not the people who can engage/ "activate" the patients.

There being no further business the meeting was adjourned at 11:39 am

MetroPlus Health Plan, Inc. Report to the HHC Medical and Professional Affairs Committee November 7th, 2013

Total plan enrollment as of October 2nd, 2013 was 422,472. Breakdown of plan enrollment by line of business is as follows:

| Medicaid | 360,019 |
|-------------------------------|---------|
| Child Health Plus | 12,217 |
| Family Health Plus | 33,813 |
| MetroPlus Gold | 3,289 |
| Partnership in Care (HIV/SNP) | 5,410 |
| Medicare | 7,305 |
| MLTC | 419 |

Attached are reports of members disenrolled from MetroPlus due to transfer to other health plans, as well as a report of new members transferred to MetroPlus from other plans.

This month, we lost approximately 3,700 members. We continue our efforts to address our membership losses and have recently completed a closer look at the application submission and acceptance process to HRA and are seeking to improve this process.

In October, the NY State of Health, the Official Health Plan Marketplace went live, offering health insurance options for consumers. As of October 24th, nearly 174,000 New Yorkers completed the full application process and were determined eligible for health insurance plans. New York State's completed applications make up more than 30 percent of the total applications completed nationwide. Additionally, as of October 24th, 37,030 New Yorkers have fully enrolled for health insurance through the NY State of Health marketplace. By media reports this number includes 23,717 in Medicaid and 13,313 in a Qualified Health Plan. The Medicaid enrollments are being held by the state and will be shared with the plans in December. NYS has started transmitting enrollments to the plan via a '834 Transaction File'. As of the writing of this report, MetroPlus has received 1,200 members that have selected MetroPlus as their plan. The plan has been informed that the processing of the enrollment transactions have been delayed, so we do not know the actual number of individuals that have chosen our plan. Additionally, NYS held a series of train-the-trainer sessions this month to allow state managed care plans and others to train Certified Application Counselors (CACs). The State mandated that training sessions could only commence upon receipt of a state- approved training curriculum. MetroPlus has received its training curriculum from NYS and will immediately begin training our Facilitated Enrollers (FEs) to serve as Certified Application Counselors (CACs).

This month, MetroPlus has entered into an agreement with eleven HHC facilities to offer a grant for MetroPlus Care Managers. This grant funds 17 positions as part of an expansion of the current HHC Emergency Department (ED) Care Case Management Project. The new MetroPlus Care Managers will be on site at each facility and will be a fully integrated and engaged member of the Inpatient Project RED and ED Care Management Interdisciplinary Teams. These care

managers will facilitate MetroPlus' patient's progress during their stay in the inpatient or ED setting. The current program is showing encouraging results and we expect that this expansion will continue to positively impact our members as they are admitted and discharged at our HHC facilities.

MetroPlus is preparing for the carve-in of the nursing home population. Beginning in January 2014, Medicaid recipients in New York City newly requiring long term nursing home placement will enroll in, or remain in, a managed care plan. Plans will be required to pay, at minimum, the current nursing home fee-for-service rate, which will include the nursing home capital component and the nursing home quality add-on, for two years. Based on workgroup recommendations, DOH is developing guidance on eligibility determination periods, network adequacy requirements, authorizations, and credentialing. The department recommended close coordination among plans and nursing homes with hospital providers, Health Homes, New York City Human Resources Administration (HRA) and Local Districts of Social Services (LDSS) around discharge planning and care management. MetroPlus' internal preparation to service this population is well underway and we anticipate no issues with this implementation.

Medical & Professional Affairs/IT Committee
November 7, 2013

"Make Every Click Count"

Accomplishments to Date

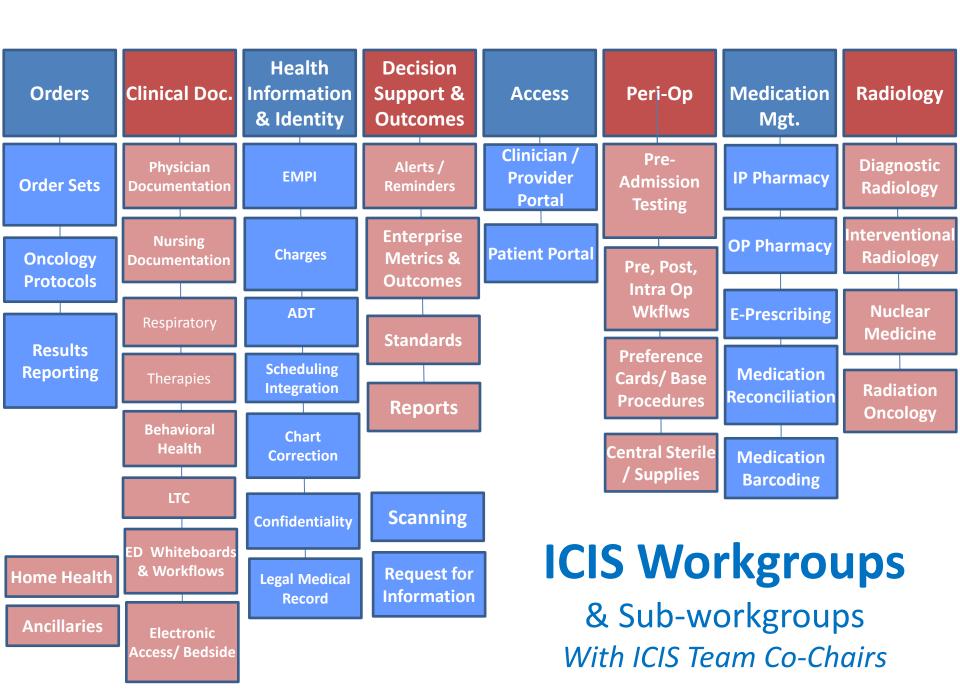

- Epic Foundation Database has been loaded on HHC servers and is operational and accessible for HHC EITS staff members
- > 95 EITS Staff have been Epic Certified in their respective modules
- Four Rounds of Workflow Preview Sessions have been completed to review the Epic Foundation functionality
 - Over 220 sessions
 - Over 2,000 workflows reviewed
 - Over 70 % consensus
 - Over 1100 Parking Lot Actions

Accomplishments to Date

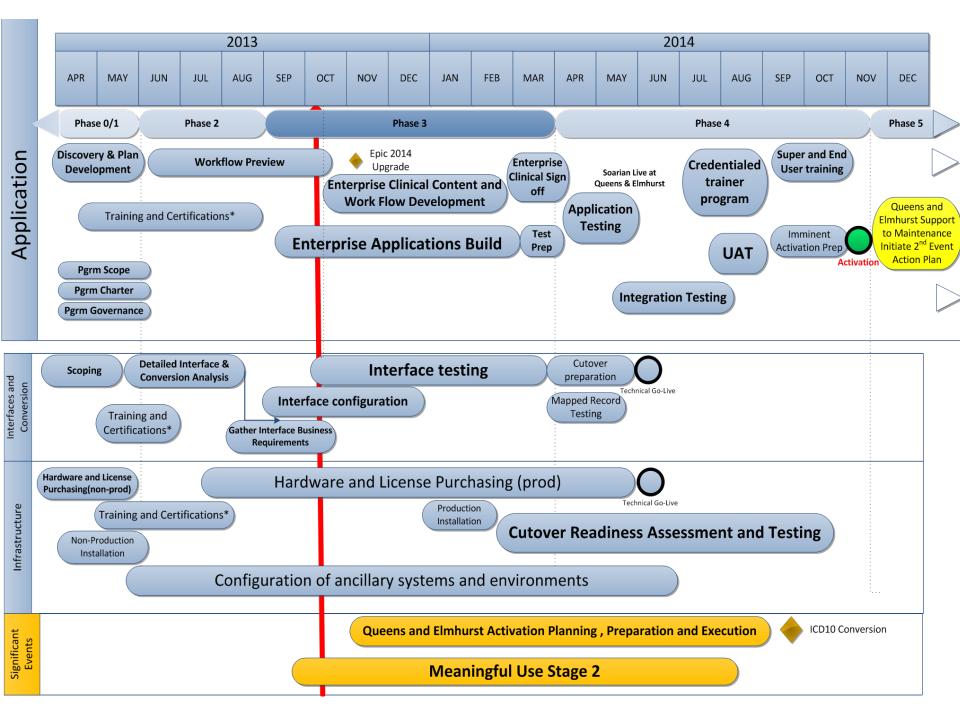

- Established weekly SOARIAN/ICIS leadership meetings
- Shared Soarian EMPI file
- Shared Soarian Facility Structure
- Conducted workshop on Medical Record clean-up and sustainment
- Identified charging data elements by service
- Scoped out interface issues
- Reorganized Soarian timeline to coordinate with EPIC (Elmhurst and Queens scheduled for April 2014)

Workgroup Focus Areas

- Nursing Orders
- Policy and Procedures for Patient Portals
- Transfers and Handoffs
- Formulary Standardization
- EMPI Management
- Ambulatory Specialty Templates (Pain Mgt., WTC, Nutrition, HIV)
- Organ Procurement
- Charging
- Materials Management Linkages
- Medication Administration
- Intraoperative Orders and Blood Administration

Soarian Next Steps

- Final Scheduling Install week of November 16, 2013
- Long Term Care Facilities installed for financials starting December 2013 concluding in February 2014
- Acute Facilities installed for financials starting April 2014 concluding in March 2015

HHC's Care Plan Management System Deploying the Patient Portal

Paul Contino, CTO Medical & Professional Affairs/InformationTechnology Committee November 7, 2013

Care Plan Management System

What it is: web-based platform providing access to care plan and care coordination transactions to the care team and to patients via respective portals

What the provider portal does: tracks patient engagement and self-management progress toward self-defined health goals

What the patient portal does: offers patients access to their care plan, discharge information, tailored preventive health recommendations, personal health information

How data is populated: either manually entered or pulled from Quadramed, UNITY and shared with the RHIO

What it is not: CPMS has patient information but it is not a full medical record

Patient Portal Deployment

- HHC Goal: Every patient will be engaged in their care; every patient will have easy access to their health information
- Portal Governance will be provided by an Oversight Committee responsible for decisions regarding:
 - Strategy for engaging patients and incorporating patient preferences in portal development
 - Recommending standard work for portal implementation and provider engagement strategies
 - Establishing unified messaging and communications about the patient portal
 - Establishing metrics for monitoring patient engagement and ensuring HHC goals and objectives are met
- Committee Representation:
 - Communications, Marketing, Information Technology, Consumers, Nursing and Clinical staff from inpatient and ambulatory care

HHC Challenge: Engaging both Patient & Provider

Patient Engagement Requires:

- Process for continuous patient input in:
 - ✓ Portal design
 - Services / Information value
 - ✓ Portal performance
- Educating patients on use of portal
 - ✓ Who's job will it be
 - ✓ How will it become standard work
- Tools for educating patients
 - Print media, video, posters, online tutorials, email, smart phone apps

Provider Engagement Requires:

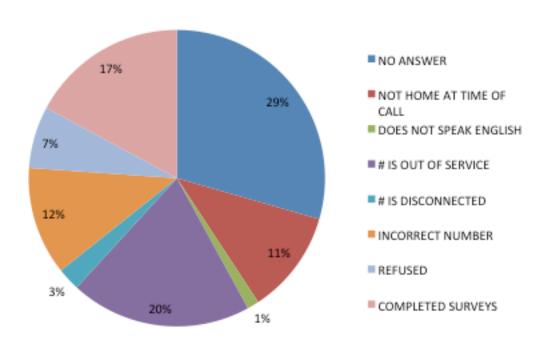

- Demonstrate how portal can be used as a patient education tool
- Effectively communicate how portal
 - ✓ Benefits the patient
 - make their work easier
 - ✓ Improves patient outcomes and patient satisfaction scores
- Make part of standard discharge process
- Make part of standard patient encounter

Patient Portal Survey Results

| TOTAL PATIENTS CALLED | 1160 |
|---------------------------|------|
| COMPLETED SURVEYS | 200 |
| BREAKDOWN OF UNSUCCESSFUL | |
| OUTCOMES | 960 |

PURPOSE:

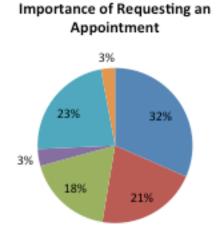

The focus of this survey was to collect PCMH patient survey responses in relation to their usage of a "patient portal". Patient portal is defined as a patient's digital access to their personal health record.

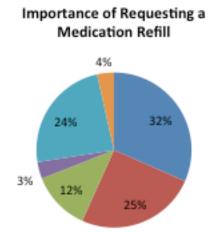

COLLECTION:

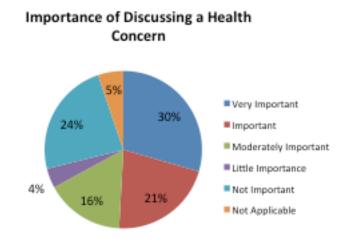

A total of 1160 patients were called to complete 200 surveys. Two hundred (200) total surveys were completed; however some patients did not answer all questions. Eight Health Home staff conducted surveys for a total of 94 hours.

Key Findings

- 70.8% of patient's say it is moderately important to very important for them to be able to <u>request an appointment</u> through the portal
- 69.1% of patient's say it is moderately important to very important for them to be able to <u>request medication refills</u> through the portal
- 66.1% of patient's say it is moderately important to very important for them to be able to <u>discuss a health concern</u> through the portal

Additional Key Findings

- 71.7% of patient's would use the website to do the following if it could be done more quickly rather than doing so in person: refill requests, referral requests or communicate with their provider
- 77.3% of patient's say they would attend a free training on how to use the website to improve their health
- 72.5% of patient's want someone they trust, like a family member or close friend, to access the patient portal on their behalf

What Patients Want

- Scheduling of Appointments

Apr 2014

- Community providers offered access to care plan
- Attestation for Meaningful Use

Meaningful Use Stage II

Measure 6 of 16 (Patient Electronic Access)

Objective: Provide patients the ability to view online, download and transmit information about a hospital admission.

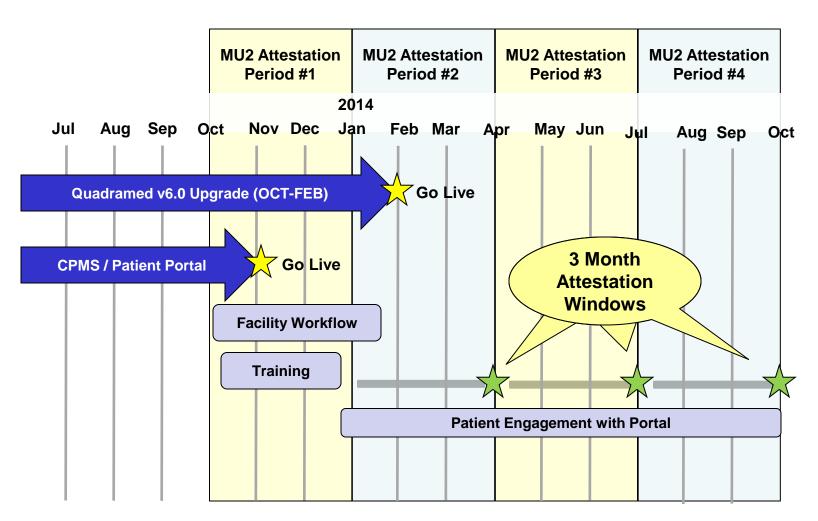

Measure:

- •More than 50 percent of all unique patients <u>discharged from the</u> <u>inpatient or emergency departments</u> of the eligible hospital or CAH (POS 21 or 23) during the EHR reporting period have their information available online within 36 hours of discharge.
- •More than 5 percent of all unique patients (or their authorized representatives) who are discharged from the inpatient or emergency department (POS 21 or 23) of an eligible hospital or CAH view, download or transmit to a third party their information during the EHR reporting period.

Meaningful Use Timeline Considerations

Allergies

| Allergen | Adverse Event Type | Adverse Event Date | Resolution Date | Reaction | Severity | Status |
|-------------|--------------------|---------------------------|------------------------|-----------|----------|--------|
| Zithromax | Drug allergy | | | eczema | Mild | Active |
| Amoxicillin | Drug allergy | | | Urticaria | Mild | Active |

Discharge Instructions

Discharge Instructions: You were admitted to QuadraMed Medical Center with a diagnosis of Pulmonary Embolism on 6/24/13. You underwent thrombolytic therapy to dissolve the embolism. You tolerated the procedure without complications and the embolism has been dissolved. Upon discharge on 6/25/13 you show no signs of bleeding or existing embolisms. If you have any questions after discharge please contact your primary care physician.

Instructions:

- 1.Follow up with you Cardiologist (Dr. Mellow) within 48 hrs after discharge.
- 2.Follow up with your primary care physician in 1 week
- 3.No heavy lifting, extraneous activity or straining.
- 4.No driving until you have been cleared by your Primary Care Physician.
- 5.If you experience any of the following symptoms call you Primary Care Physician or return to the Emergency Department immediately:
- a Chest Pain
- b.Shortness of Breath
- c.Difficulty walking
